

FINALLY!!

ALL POSTED AT 12:25am Sunday June 13

It has been an extremely time consuming process with several mix ups in running orders vs the gate sheets.

Understandably this happens with many people running multiple dogs in other rings.

On average, during the sorting, each dog is viewed five-six times before the editing (removing bad ones) begins and the web pages are created.

Of course a few delays (ok call them excuses) get in the way of sorting/posting... work, cutting the grass, beer store, brushing the dog(s), playing agility and a little bit sleep

A Few Questions emailed questions answered below

Question: why do we take the time to sort by dogs name and not by group/ring/round?

Answer: do you really want to look through 900-1400 photos of your group in each ring/round to find your dog(s)

Question: how long are the photos posted for, do i have to buy right away?

Answer: on average they are available to view online for 1-2 years. All images are archived on hard drives and DVD's, order 5 years from now if you like.

Additional benefit why we sort by name. When you do order 5 years from now, locating your dog(s) is quick! We do not have to search the archives for several hours or days for that b/w bc that ran agility way back when.

THANK YOU ALL FOR BEING SO PATIENT!!
